Experience

For more than 50 years, SKF® has been the industry leader in ball screw design engineering and manufacturing. With a combined total of 115 years of ball screw repair and ball screw engineering experience, SKF has the technical expertise you've come to expect and depend on to keep your equipment running. Our dedicated service channel will address your ball screw repair needs in the most timely manner possible.

Quality

For years, SKF has been synonymous with quality and reliability. In our efforts to provide you with world-class products and services, all our repaired ball screws must pass a final inspection to insure that you receive the highest quality product possible.

We also offer a wide array of supporting linear products. For more information, please call our customer service department at 1-800-447-8913, or find us on the web at www.linearmotion.skf.com.
