

LOREN KRANTZ, PRESIDENT, INDUSTRIAL TOOL, INC.
– CUSTOM MACHINE TOOL BUILDER

“Russell T. Gilman, Inc.,
gave us a direct link to
the engineers who can
make an idea happen ...
right now.”

Al Stinn, Sales Manager (left) and
Ed McDonald, CEO, Industrial Tool, Inc.

Can this be done? (We need an answer in two hours!)

The sale was on the line. Industrial Tool, Inc. needed to know if their idea for specialized spindle modifications would jeopardize their design for two high-volume automotive parts machines.

No problem. As manufacturers of precision machine tool components, we recognize the benefits of giving designers greenlight access directly to our engineers. Instant feedback. Increased efficiency. Enlightened decisions.

At Russell T. Gilman, we think custom relationships are the key to custom solutions. Call us. We'll prove it.
